

The **CE marking** certifies that a product has met EU consumer safety, health or environmental requirements. CE stands for Conformit Europeenne, "European Conformity" in French and meaning  conforms to EC Directives. CE marking together with the **EN standard** for safety reflectors requires an extensive testing process for a documented certification from the testing authority in European Union.

The lines of reflective safety products at Seguran gora.com are tested and certified by the authorities according to EC Directives, provided with the CE EN standard. Each new product in these certificated product lines are manufactured by the directives.

**The measurements of quality:**  
- **CE EN 13356** standard for "High-visibility accessories for non-professional use", states the minimum requirements for pedestrian reflectors, for reflecting values, water tightness, markings  
- **CE EN 471** standard for High-visibility Warning Clothing for professional use, with class 2 define the minimum areas of visible materials on the safety vests and clothing  
- **CE EN 1150** is the standard for High-visibility Warning Clothing for non-professional use

Seguran gora.com sells soft prismatic Safety Reflectors utilising **3M** Scotchlite reflective High Gloss film for pedestrian safety meeting the CE requirements for quality and visibility.
